Sequence 558, Application US/09938842A

Patent No. US20020160378A1

Patent No. US20020160378A1

Patent No. US20020160378A1

PAPLICANT: Harper, Jeff
APPLICANT: Wang, Xun
APPLICANT: Zhu, Tong
TITLE OF INVENTION: STRESS-REGULATED GENES OF PLANTS, TRANSGENIC PLANTS CONTAINING
TITLE OF INVENTION: STRESS-REGULATED GENES OF PLANTS, TRANSGENIC PLANTS CONTAINING
TITLE OF INVENTION: SAME, AND METHODS OF USE
FILE REFERENCE: SCRIPTION UMBER: US 60/227, 866

PILE REFERENCE: SCRIPTION UMBER: US 60/227, 866

PRIOR APPLICATION NUMBER: US 60/227, 866

PRIOR APPLICATION NUMBER: US 60/264,647

PRIOR APPLICATION NUMBER: US 60/264,647

PRIOR APPLICATION NUMBER: US 60/264,647

PRIOR APPLICATION NUMBER: US 60/300,111

PRIOR APPLICATION NUMBER: US 60/300,111

PRIOR FILLING DATE: 2001-06-22

NUMBER OF SEQ ID NOS: 5379

SEQ ID NO 558

TYPE: DNA
ORGANISM: Arabidopsis thaliana

-!- SUBCELLULAR LOCATION: MICROSOMAL MEMBRANE. BOUND TO THE CYTOPLASMIC SIDE OF THE ENDOPLASMIC RETICULUM (BY SIMILARITY).
-!- SIMILARITY: BELONGS TO THE CYTOCHROME B5 FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ATSG53560 OR MNC6.10.
